AFMAN 23-110, Volume II, Part Two, Chapter 27, 1 January 2001, is supplemented as follows: This supplement applies to organizations supported by SAFB Base Supply, including tenants and satellites. It does not apply to any geographically separated unit. Maintain and dispose of records created as a result of processes prescribed in this publication in accordance with AFMAN 37-139, **Records Disposition Schedule** (will become AFMAN 33-322, Volume 4).

27.28.2. The DD Form 1348-6, **DoD Single Line Item Requisition System Document**, file will be used at this activity rather than the Base Contracting Automated System (BCAS) item listing.

27.31.2.1. If identification cannot be accomplished, the Demand Processing Element will contact the requester or materiel control element for additional information to prepare the DD Form 1348-6 and obtain a realistic description to facilitate requisition action. Demand Processing Element will annotate the request with time, date, and name of person contacted at the applicable organizational or materiel control element. If technical data is not available or the item is difficult to describe, the organization will be requested to furnish a photograph or drawing of the item. If this required data is not received within four (4) duty hours, the request will be annotated "**cancelled**" with the reason. Demand Processing Element will then notify the requester or materiel control that action has been stopped and to resubmit the request with the needed data.
